

The 20th Budapest Nephrology School
 (Nephrology, Hypertension, Dialysis, Transplantation)
ISN, ERA-EDTA and ISP
 26–31 August, 2013

Special Program on the 20th Anniversary of BNS

Held at the Semmelweis University with a highly distinguished international faculty, this program is one of the best known and oldest refresher courses on nephrology that has attracted many young physicians from Europe and around the world during the past two decades. The course is designed to meet the requirements of 30 European/US CME credit points. For Hungarian participants the course is accredited by OFTEX for 50 credits.

Features:

- This year, we have the 20th anniversary of the Budapest Nephrology School. Therefore, we would like to make this year even more memorable and enjoyable for the participants.
- Meet the Professors: session during which the participants discuss their experiences and observations with the faculty.
- Poster session during which the participants discuss and consult their own research cases with the faculty.

- Modest participation fee which includes: attendance to nephrology refresher CME course; certificate of attendance; refreshment, lunches and dinners; one-day preschool tour in the picturesque region of Hungary together with the leaders of international nephrology (ISN and ERA-EDTA present and past presidents); 11th International Wine and Health Symposium; evening Danube cruise; organ concert at St. Stephen's Basilica; sightseeing tour with Parliament visit; farewell reception; support for buying the book of Nephrology, Hypertension, Dialysis, Transplantation (Eds: Thomas E. Andreoli, Eberhard Ritz, László Rosivall), all coming with Hungarian hospitality.
- ERA-EDTA grants are available (<http://www.era-edta.org/Budapest2013.htm>).

MEDISTANCE távgondozási rendszer - Ajánlja pácienseinek!

Folyamatos 24/7/365 otthoni, beállított gyógyszeres terápia és egészséges életmód követés, valid zártláncú adatkezeléssel, mobil GPRS/M2M rendszerrel.

- A mérési eredmények az orvos számára rendezett formában hozzáférhetők.
- Lehetővé teszi a statisztikai értékek gyors áttekintését és a tiszta tendenciák validálását.
- Egészségügyi állapotok összefüggéseikben analizálhatóak.
- Szorosabb kontroll a jobb gyógyszeradagolás érdekében.
- A személyes látogatások száma csökkenhető.
- Az orvos kiszállási költségei megtakaríthatóak.

A készülék és a szolgáltatás a gyógyszertárakban megvásárolható!
